

SOLAS MARINE SERVICES GROUP

COMPLETE SOLUTIONS

ASSET LEASE

WWW.SOLASMARINE.COM

SOLAS Rental Division started in 2000 to meet the growing demands of H2S protection in the oil & gas fields. Equipment and systems are provided on a rental basis to monitor and protect personnel from poisonous toxic gases like hydrogen sulphide. The Solas Rental Division was later renamed as Asset Lease in the year 2019. The division specializes in

Design, Supply, Installation, Testing, Commissioning and Maintenance of H2S detection and protection system

Provides reliable and efficient H2S Gas Alarms and Safety Protection Systems suitable for use in offshore/onshore drilling rigs, barges, supply vessels and testing vessels

Servicing of Breathing Apparatus, Escape Sets, Compressors and Medical Oxygen Resuscitators

All Technicians are trained by Certified & Competent Internal Trainers.

Providing on-board H2S Training by Certified Trainers

Breathing Air Cascade System

Breathing Air Cascade System is a fixed air support system fitted onboard offshore & onshore drilling platforms, offshore accommodation, support barges and supply vessels to protect human lives from highly poisonous, corrosive and flammable gases like hydrogen sulphide. The systems are designed based on the number of POB and the specific requirements from customers who operate in the fields of ARAMCO, ADNOC, PDO, ONGC & QP.

10ft Containerized B.A. Cascade System

20ft Containerized B.A. Cascade System

BA Compressor – Electrical and Diesel

Cylinder Rack

Breathing Air Manifold

Cylinder Filling Station

Gas Detection Equipment

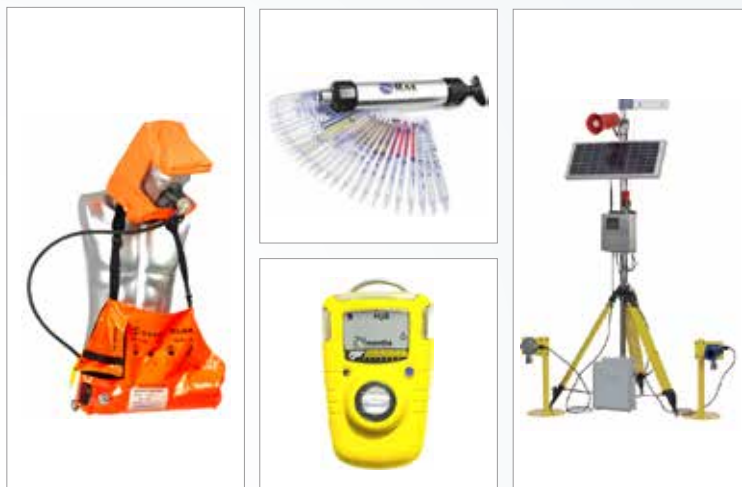

Solas Asset Lease offer gas detection systems, both conventional and wireless. We carry out services, commissioning and recertification jobs for gas detection systems. We offer equipment from renowned brands in the field of gas detection technology, namely Honeywell Analytics.

Fixed Gas Detection System

Calorimetric Gas Detection Tubes

Portable Gas Monitors

Wireless Gas Detection System

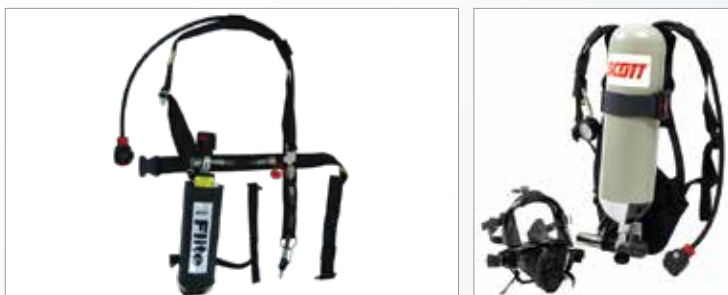

Breathing Apparatus

Solas Asset Lease provides SCBA, EEBD & ELSA which are positive pressure type equipment. We offer brands such as Scott Safety by 3M & Sekur DPI. Voice amplifiers are provided with the breathing apparatus based on customer requests.

Voice Amplifier

Self Contained Breathing Apparatus

Emergency Escape Breathing Device

H2S Safety Technicians

Solas H2S Technicians are well trained and experienced to

Respond to an H2S emergency in a calm and professional manner

Handle all safety equipments & to maintain them in perfect working condition

To assist customers in managing an H2S emergency in the best possible manner

Conduct on-board H2S Drills in a proficient manner

Solas H2S technicians are certified by OEM & third parties. They are equipped & trained to deal with gas related incidents in the offshore and onshore sour gas fields.

MODULAR BREATHING UNIT

It is a system that is flexible to accommodate your requirements on breathing air that includes an air compressor, fill station and storage rack, all enclosed on a well-designed skid. The system is used to deploy breathing air through manifolds which are connected to a breathing apparatus. Robust design of the modular breathing unit allows user for easy installation and mobilization using minimal foot-print area.

SOLAS H2S TRAINING DIVISION

Solas H2S training wing provides OPITO certified Basic H2S awareness training courses. The course is intended to provide personnel with the necessary knowledge and understanding of particular hazards and properties of H2S. The personnel also gains understanding of appropriate emergency response actions to take should an H2S related incident arise.

MODULAR TROLLEY CASE

The unit is a portable BA Cascade system which is easy to transport. It is wheel mounted and can be put into operation by hooking the breathing apparatus in short time. The design makes it easy to deploy and handle.
