Superior Quality Marine Chemicals - Since 1953

Our mission

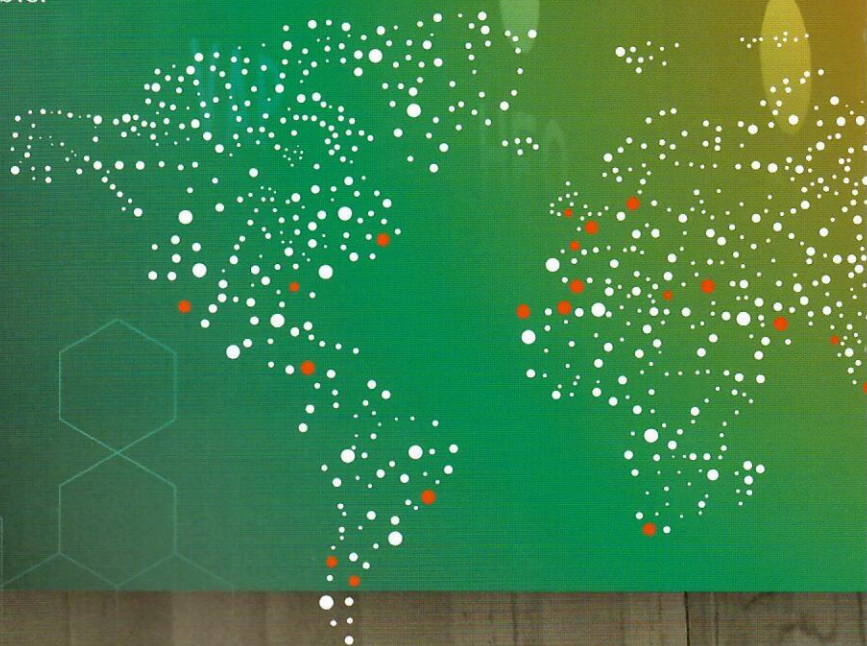

At Vecom Marine we strive daily to provide the maritime industry around the world with reliable, high-quality maintenance and cleaning chemicals to ensure optimal vessel operation.

Our solutions

We have a carefully structured range of products, with many designed to complement each other and bring out the best of their capabilities when combined. Coupled with our hands-on technical support, we are ready to assist and find the best solution for your challenges, wherever your vessels may call.

Our network

Our worldwide network is made up of exclusive distributors with extensive product knowledge and local market expertise. Our different cultures working together keeps us grounded and helps us see the bigger picture when it comes to our customers' needs. Our distributors meet our high-quality performance standards with timely deliveries, reliability and the best customer support possible.

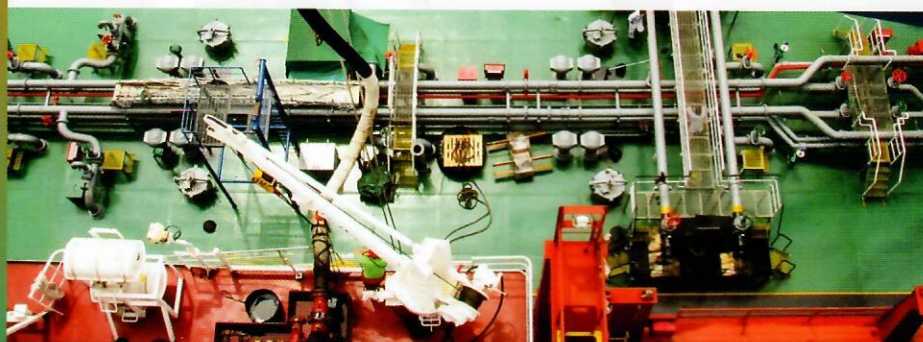

The value you need

Our centralised production enables us to offer consistent quality, benefit from economies of scale and maintain low overhead costs. Our network is consistently growing and strengthening our presence in the market. Ambition drives us to bring the best possible value, through each of our products, to our customers. Our products are designed to keep customers' long-term costs low and provide their vessels with optimal maintenance.

Our chemicals

Vecom Marine chemicals are produced in the Netherlands. We are chemists and engineers who restlessly support the marine world with unmet needs, be it new difficult challenges or lowering costs, all the while keeping our products as environmentally acceptable as possible.

A short introduction to our product types

Wt

Water Treatment

Water treatment is a serious matter for us.

We offer effective, top-quality products for conditioning cooling water and boiler water, preventing scale formation and corrosion, neutralising pH, etc. Our products received approvals from major engine manufacturers. Our easy to use test kits for determination of alkalinity, chloride, nitrite, DEHA, phosphate and hardness are a preferred choice for many ship engineers. Combined with our dedicated technical experts' support, there is no water we cannot cure.

Ft

Fuel Oil Treatment

From better combustion to keeping the fuel tank clean in motion, maintaining ship engines to best performance is vital for avoiding troubles and extravagant expenses. We offer various effective products for fuel oil treatment. These include sludge dispersants, lubricity improvers, soot removers, combustion improvers, carbon oxidation catalysts, slag modifiers and reducers of the harmful effects of vanadium oxides. We also provide a range of fuel and lube oil test kits.

Chc

Cargo Hold Cleaning

With 80% of the world's goods being transported with ships, clean cargo holds are important to us all. We at Vecom Marine are playing our part, keeping a balance between getting the job done and keeping our products environmentally acceptable. Our range includes barrier coating, latex and resin cleaners, cement and coal tar removers, concrete splatter, lime and rust removers.

Tc

Tank Cleaning

Being experts in the tank cleaning department, we offer extremely powerful solvent cleaners, environmentally friendly degreasers, water-based alkaline cleaners for high-pressure cleaning machines, etc. There is no job that our experienced technical staff cannot advise on.

Ed

Engine Room & Deck Cleaners

There are multiple unique cleaning requirements on board a vessel and we can offer effective solutions for all of them. Our range includes air cooler cleaners, degreasers, descalers, rust removers, electro cleaners, filter cleaners, separator disc cleaners, ultrasonic cleaners, oil spill dispersants and many more.

Cl

Cruise Line & Accommodation

The quality of passenger and seafarer's life on board is as important as maintaining a vessel's engine in proper condition. Hand cleaners, sanitation treatments and sanitation testing kits, as well as multi-cleaners and air fresheners make us confident that we can ensure a safe and comfortable trip.

Sp

Specialty Products

We have developed unique solutions inspired by the industrial sector that we found lacking in the marine world. From pickling and passivating steel products and metal treatments test kits, to gasoline & water finder pastes, our specialty products make us stand out.

Dq

Dosing & Monitoring Equipment

For ensuring that every treatment is conducted in the correct way and delivers the best result, we offer a range of proven and reliable dosing and monitoring solutions.

Rw

Refrigerants, Welding Gases & Welding Equipment

Through our extensive network of selected local suppliers we provide a range of refrigerants and welding gases that meet the highest quality standards.

The Vecom Marine Story

Our story begins in 1953 in Maassluis, an old town near Rotterdam in the Netherlands. In a tightly packed warehouse, two men - Dr. Willem Verbon, an inventor and chemical engineer, and Jo de Vries, chief engineer of the Nedlloyd shipping company - were determined to solve the problems seafarers faced in their daily lives.

Vecom is the combination of the founders' names' first letters. With their combined forces, these ingenious inventors came up with superior quality products that optimised vessel performance and reliability, reducing costs for ship owners. The company quickly expanded to a worldwide reach and since then has been on the forefront of the industry's development, setting a standard for others.

Today we are privileged to distribute our products within 55 countries and over 300 ports.
