

Solas Marine Services Group

IMO Guidelines for Lifting Appliances

MSC CIRC 1663

- Inspection, Maintenance, overhauling, load testing & certification of cranes and deck equipment.
- Loose lifting gear inspection, load testing & certification.

Our Services

Inspection

We provide a health assessment of hydraulic systems, outlining necessary actions for smooth operations.

Maintenance

We conduct inspections, cleaning, and replacements to maintain system efficiency and prevent breakdowns.

Certification

We provide training for safe operations of lifting equipment to operators, banksman and riggers.

Load Testing

Our test houses are equipped with resources that meet specifications, and operated by qualified personnel.

Why Choose Us?

Your One-Stop Shop for MSC Circ 1663 Compliance
OEM-Trained Engineers and Technicians
Quality Service Guaranteed

- ✓ Precision and Power
- ✓ Custom Engineered Solutions
- ✓ Responsive and Expert Service
- ✓ Unmatched Reliability and Durability

QUALITY GUARANTEED

Elevate Your Business with Us

Business Consultation

Few companies in the Middle East have the required service and certification. We have a trained team prepared to service and test lifting equipment.

Strategy Development

All team members are trained to inspect and certify lifting equipment. We will assess inquiry volumes and expand our workforce if needed.

Solution Implementation

The guidelines specify requirements for lifting appliances and loose gear on vessels regarding design, inspection, maintenance, and certification.

Who We Are?

For over 35 years, Solas Marine Services Group has delivered safety solutions for Life Saving Appliances (LSA) and Fire Fighting Appliances (FFA) in the marine sector. They serve the marine, oil and gas, and civil sectors across the Middle East and Asia, maintaining a strong local presence and a reputable brand.

What We Do?

- We provide hydraulic sales, services, and lifting equipment inspections for the marine and oil & gas industries.
- Our expertise includes supplying and installing marine and offshore cranes.
- We design and deliver hydraulic power units for global crane use.
- We offer hoses and fittings for various hydraulic applications.
